# MuDD-Dry

## Solidification Reagent for Drilling Fluid Management

**MuDD-Dry** is a proprietary solidification reagent used with pumpable or non-pumpable materials using our mixing delivery system or excavator bucket mixing. It is very effective in the solidification of drill cuttings, drilling mud, hydrovac mud and industrial sludge.

### Mudd-Dry:

- ❖ Reduces **RISK** & improves site safety
- ❖ Reduces **COST** of managing liquid waste
- ❖ Reduces **ENVIRONMENTAL** impact

- ❖ Immediately converts liquid/semi-solid waste streams to a solid (<10 min)
- ❖ Works effectively with bulk mixing applications
- ❖ Creates a dry, stackable solid for easy handling
- ❖ Can be used in clean fill applications significantly reducing disposal costs
- ❖ Landfill friendly

**MuDD-Dry** has tremendous absorption capacity, up to 300 times its own weight. To see MuDD-Dry in action, check out this video link.
